TOMÁS MUNÉVAR ESCALANTE

Bogota, Colombia | tomasmunevar36@gmail.com | www.tomasmunevaresca.com

FULL STACK DEVELOPER

Full Stack Developer specializing in TypeScript (Next.js / NestJS / React) with 4+ years of professional experience. Proven track record building AI-powered platforms with LLM integrations (LangChain, OpenAI, Anthropic, Gemini), voice agents and transcription (Deepgram, ElevenLabs), and document processing pipelines. Experienced in cloud infrastructure (Azure, AWS, GCP, Docker), healthcare interoperability (FHIR/HL7), and payment gateway integrations. Available for new opportunities and freelance projects.

WORK EXPERIENCE

CTO | Daleen — Sep 2026 - Present

- Lead technology at Daleen (MindMarks group): CRM, AI agents and custom software for 25+ businesses in Colombia, Panama and the US. Joined through the merger of my company, Zakumi Estudio.
- Built a client portal on top of Daleen CRM (Next.js 16, TypeScript): 6-digit code sign-in, encrypted cookie sessions with no database of its own, and per-module permissions for 29 accounts.
- Shipped a production WhatsApp AI agent (Claude) for an insurance broker: quoting, a five-step claims flow across 13 insurance lines, Google Meet booking in the CRM calendar, and automatic human handoff.

Full Stack & AI Engineer | ConsiliumBots · Tether Education — Jun 2026 - Oct 2026

- Built Module Flow Engine, a drag-and-drop survey builder with conditional logic (React, TypeScript, Firebase), and shipped a 42-module instrument for a Yale study with Pontificia Universidad Javeriana.
- Built LUCI's voice validation pipeline: ElevenLabs phone agents that call childcare centres, an HMAC-signed post-call webhook, and cron dispatch with daily call caps.
- Delivered Tether Studio's product app (React 19, Supabase) with strict row-level security per role and consent-gated AI photo editing.

Founder | Principal Engineer | Zakumi Estudio — Jun 2026 - Sep 2026

- Built and deployed a WhatsApp sales and support agent powered by Claude, handling real customer conversations for local businesses.
- Developed the admin control centre (Next.js 16, Supabase, Vercel): a Google Places prospecting map, a CRM pipeline that writes automatic notes via database triggers, and a bot console with prompt diff and rollback.
- Built a customer 360 view with recurring revenue tracking, contracted products and an upsell engine.

Full Stack Developer | Product Manager | Nebula Medical — Aug 2025 - Apr 2026

- Built Scribe, an AI-powered clinical documentation platform integrating multiple LLM providers (OpenAI, Anthropic, Gemini) via LangChain with LangSmith tracing, voice-to-text transcription with Deepgram SDK, and structured data extraction from PDFs and images.
- Developed a microservice payment gateway (gRPC + Express) for subscription flows with Stripe and Wompi, FHIR-compliant health data export, and background jobs with Trigger.dev for archival and cleanup.
- Migrated file storage to Azure Blob Storage, integrated Azure Communication Email, and built enterprise authentication with Clerk and Azure Entra ID (MSAL) for social login and organizational SSO; containerized services with Docker and managed infrastructure with Terraform.
- Built pixel-perfect, responsive interfaces with Next.js App Router, React 19, Tailwind CSS 4, and Framer Motion for smooth UI animations across the clinical platform

Frontend Developer | Crowdi — Apr 2025 - Aug 2025

- Development of UI components and pages for a fintech platform using React and TypeScript.
- Implemented responsive interfaces following design specs with Tailwind CSS.
- Collaborated within an agile team with iterative delivery cycles and peer code reviews.

Backend Developer (NESTJS) | Gestocker | Collaborative Project Feb 2025 - Apr 2025

- Implementation of a roles and authentication system with JWT and OAuth2.0.
- Secure payment integration with Stripe and email notifications using Nodemailer.
- API documentation with Swagger for better maintainability.

Teacher Assistant | Soy Henry Bootcamp Jan 2025 - May 2025

- Technical mentor for bootcamp students, troubleshooting issues with different technologies
- Technical leadership · Clear communication · Debugging · Agile/Scrum · Empathetic teaching.

Frontend Developer | MindMarks Nov 2023 - Mar 2024

- Collaborated in an agile team to build a finance blog for Davivienda
- Participated in code reviews and followed Git Flow practices to ensure clean, version-controlled code.
- React, JavaScript, HTML5, CSS3, Git, Agile/Scrum

SKILLS

- HTML5
- CSS3
- JavaScript
- TypeScript
- React.js
- Next.js
- Tailwind CSS
- Figma
- Express
- Clerk / Entra
- Cron Jobs
- Node.js
- Express.js
- NestJS
- PostgreSQL
- MongoDB
- /Prisma
- TypeORM
- JWT
- OAuth2
- Docker
- FHIR / HL7
- Swagger
- gRPC
- Zod
- LangChain
- LangSmith
- Braintrust
- OpenAI / Anthropic / Gemini
- Deepgram
- Azure / AWS
- Git / GitHub / GitLab
- Cron Jobs

EDUCATION

Full Stack Developer | Henry Bootcamp Nov 2024 - May 2025

- Mastered advanced concepts through 800+ intensive hours of hands-on coding
- Built production-ready apps using MERN stack with TypeScript integration
- Implemented professional workflows (Git, Agile, CI/CD) in team projects

Master en Coding | Dev.F Jan 2021 - Jan 2022

- Learned fundamental programming concepts through practical exercises
- Developed problem-solving skills with basic algorithms and data structures
- Gained collaboration experience through pair programming sessions

C1 English Certificate | CONINGLES Feb 2015 – Feb 2017

- Acquired comprehensive skills in English grammar and vocabulary, enhancing both academic and professional language capabilities.
