

TOMÁS MUNÉVAR ESCALANTE

Bogota, Colombia | toasmunevar36@gmail.com | www.tomasmunevaresca.com

FULL STACK DEVELOPER

Full Stack Developer specializing in TypeScript (Next.js / NestJS / React) with 4+ years of professional experience. Proven track record building AI-powered platforms with LLM integrations (LangChain, OpenAI, Anthropic, Gemini), voice agents and transcription (Deepgram, ElevenLabs), and document processing pipelines. Experienced in cloud infrastructure (Azure, AWS, GCP, Docker), healthcare interoperability (FHIR/HL7), and payment gateway integrations. Available for new opportunities and freelance projects.

WORK EXPERIENCE

Teacher Assistant | Soy Henry Bootcamp

Jan 2025 - May 2025

- Technical mentor for bootcamp students, troubleshooting issues with different technologies
- Technical leadership · Clear communication · Debugging · Agile/Scrum · Empathetic teaching.

Frontend Developer | MindMarks

Nov 2023 - Mar 2024

- Collaborated in an agile team to build a finance blog for Davivienda
- Participated in code reviews and followed Git Flow practices to ensure clean, version-controlled code.
- React, JavaScript, HTML5, CSS3, Git, Agile/Scrum

Backend Developer (NESTJS) | Gestocker | Collaborative Project

Feb 2025 - Apr 2025

- Implementation of a roles and authentication system with JWT and OAuth2.0.
- Secure payment integration with Stripe and email notifications using Nodemailer.
- API documentation with Swagger for better maintainability.
- Modular and scalable architecture, facilitating future updates.

Frontend Developer | Crowdi

Apr 2025 - Aug 2025

- Development of UI components and pages for a fintech platform using React and TypeScript.
- Implemented responsive interfaces following design specs with Tailwind CSS.
- Collaborated within an agile team with iterative delivery cycles and peer code reviews.
- Maintained clean, modular component architecture following best practices.

Full Stack Developer | Product Manager | Nebula Medical

Aug 2025 - Apr 2026

- Built Scribe, an AI-powered clinical documentation platform integrating multiple LLM providers (OpenAI, Anthropic, Gemini) via LangChain with LangSmith tracing for observability.
- Implemented voice-to-text transcription pipelines using Deepgram SDK and document parsing with structured data extraction from PDFs and images.
- Developed a microservice payment gateway (gRPC + Express) handling subscription flows, integrated with Stripe and Wompi.
- Migrated file storage infrastructure to Azure Blob Storage and integrated Azure Communication Email and Azure MSAL for enterprise authentication.
- Built FHIR-compliant health data export and managed background jobs with Trigger.dev for archival and cleanup processes.
- Containerized services with Docker and managed cloud infrastructure with Terraform.
- Integrated Clerk and Azure Entra ID (MSAL) for enterprise authentication flows, supporting both social login and organizational SSO.
- Built pixel-perfect, responsive interfaces with Next.js App Router, React 19, Tailwind CSS 4, and Framer Motion for smooth UI animations across the clinical platform

Full Stack & AI Engineer | ConsiliumBots • Tether Education

Jun 2026 - Present

- Built Module Flow Engine, a drag-and-drop survey and flow builder with conditional routers, repetition, and Handlebars variable piping, deployed continuously to Firebase Hosting.
- Shipped a 42-module conditional instrument to production for a Yale research study run together with Pontificia Universidad Javeriana, including per-family personalized links generated from CSV.
- Built LUCI's voice validation pipeline: ElevenLabs phone agents that call childcare centres and write back to the database, an HMAC-signed post-call webhook with idempotent logging, and cron dispatch with daily call caps and retry escalation.
- Delivered Tether Studio's product app (TanStack Start, React 19, Supabase) with strict row-level security per role and consent-gated AI photo editing.
- React, TypeScript, Supabase, PostgreSQL, Edge Functions (Deno), ElevenLabs, Firebase Hosting.

Founder | Principal Engineer | Zakumi Estudio

Jun 2026 - Present

- Built and deployed a WhatsApp sales and support agent powered by Claude, handling real customer conversations for local businesses.
- Developed the admin control centre: a Google Places prospecting map, a CRM pipeline that writes automatic notes via database triggers, and a bot console with side-by-side prompt diff, rollback and a test chat.
- Built a customer 360 view with recurring revenue tracking, contracted products and an upsell engine.
- Next.js 16, TypeScript, Supabase, Google Places API, GSAP, Vercel.

SKILLS

- | | | |
|-----------------|--------------|-------------------------------|
| • HTML5 | • Node.js | • Swagger |
| • CSS3 | • Express.js | • gRPC |
| • JavaScript | • NestJS | • Zod |
| • TypeScript | • PostgreSQL | • LangChain |
| • React.js | • MongoDB | • LangSmith |
| • Next.js | • /Prisma | • Braintrust |
| • Tailwind CSS | • TypeORM | • OpenAI / Anthropic / Gemini |
| • Figma | • JWT | • Deepgram |
| • Express | • OAuth2 | • Azure / AWS |
| • Clerk / Entra | • Docker | • Git / GitHub / GitLab |
| • Cron Jobs | • FHIR / HL7 | • Cron Jobs |

EDUCATION

Full Stack Developer | Henry Bootcamp

Nov 2024 - May 2025

- Mastered advanced concepts through 800+ intensive hours of hands-on coding
- Built production-ready apps using MERN stack with TypeScript integration
- Implemented professional workflows (Git, Agile, CI/CD) in team projects

Master en Coding | Dev.F

Jan 2021 - Jan 2022

- Learned fundamental programming concepts through practical exercises
- Developed problem-solving skills with basic algorithms and data structures
- Gained collaboration experience through pair programming sessions

C1 English Certificate | CONINGLES

Feb 2015 - Feb 2017

- Acquired comprehensive skills in English grammar and vocabulary, enhancing both academic and professional language capabilities.
